REVISIONS

Several Theme Disks have recently been revised or removed. If you have experienced problems with these disks, then perhaps the information below may help you. If not, then please write for assistance.

▪ D-60 D-UTILITIES!
Les Wagar recently enhanced his excellent disk utilities package to make it better than ever. If you purchased this disk from us prior to September, 1992, then return it in exchange for a FREE update.

▪ 220 VIDEO EDITOR
This disk has been removed from our library as it was discovered that some of its data was missing. If you purchased this disk from us, then return it for a FREE BELLCOM Theme Disk of your choice.

● 395 AMNESIA
We neglected to mention in the 1992 Catalogue that this sensational game is a Shareware program by Robert Stuart of Scotland, publisher of the EXCEL DISK MAGAZINE. If you haven't got it, then get it. Its amazing!

● ATTENTION ATARI USERS
Some disks contain DOC files which are not accessed by the self-booting program on the disk. With your favourite DOS loaded, always check the directory of the disk to see if there is a helpful DOC file present.

● PUBLIC DOMAIN WANTED
We are always on the lookout for top-notch P.D. and Shareware for our customers. If you have written programs, or have any P.D. programs in your collection that are not currently in our library, then please forward a list to us. For each disk of programs you send us at our request, we will ship a BELLCOM Theme Disk of your choice to you FREE. Please, do not send us unsolicited disks, as we cannot guarantee their return or exchange, should they contain programs we already have. Thank you!

The BELLCOM BULLETIN

WINTER 1993

Dear Atari Users,

As we begin a new year and our thoughts turn to family and friends, I wanted to let you know how much I value your support. Since 1986, BELLCOM's aim has been to provide Atari 8-bit users with the highest quality Public Domain & Shareware available. As BELLCOM begins its 7th year of service, my success is thanks to the loyalty and continued support of customers like you.

As long as BELLCOM continues to support the Atari 8-bit computer, my commitment to you is to continue to provide you with the best Public Domain software, the best service, and the best value! I pray that you and your family experience good health, happiness, and great prosperity in 1993, and may God richly bless you.

Sincerely,

Don Bell, Owner

New... SUPPLEMENT #1

BELLCOM is pleased to present the first Supplement to the current 1992 Public Domain & Shareware Catalogue. SUPPLEMENT #1 lists over 70 new Theme Disks added to the BELLCOM library. Over 150 new programs from around the world. As always, each and every program has been carefully tested and is GUARANTEED to run on your system or I'll replace it for Free. You just can't lose with BELLCOM.

Please keep this Supplement with your copy of the BELLCOM 1992 Catalogue. Rather than re-print the entire Catalogue this year, I decided to release periodic Supplements instead. Keeping printing costs low enables me to pass on the savings to you in the form of lower prices! Remember, the enclosed Supplement only contains the latest Theme Disks to

be added to the BELLCOM library. The rest are clearly listed in the current 31 page 1992 Catalogue. There's over 700 Theme Disks in all. If you've misplaced your Catalogue, simply write to me and I'll rush a complimentary copy to you.

You'll be thrilled with these new Theme Disks. Enjoy all the latest programs from Europe and North America. Colorful demos, games, playable game demos from Germany, and amazing graphic utilities like DRAW-7 and COLORFONT COMPENDIUM. Once, quality programs like these could have sold commercially for up to $40.00 apiece. Now they're yours, all at low Public Domain prices. Don't miss out – order a bunch today!

BELLCOM MAY DROP 8-BIT!
Details inside...

Unless we receive a substantial number of orders as a result of this latest Supplement offer, I may be forced to stop supporting the Atari XL-XE computer!

For 7 years, BELLCOM has been providing Atari 8-bit owners with the biggest and best selection of Public Domain & Shareware available. I've stayed with Atari through thick and thin, when I could have made much more by supporting any of the more popular brands. In 1992, however, sales were lower than in previous years. Of the Atari 8-bit owners who received the 1992 Catalogue, many have not yet responded with an order! Regretfully, unless I receive their orders soon, this Supplement will be the last they receive. Last year I had to remove from my mailing list over 1200 people who hadn't ordered since 1991. I can't add any potential new customers to my mailing list because there is nowhere left to advertise. Display ads in the 3 remaining Atari publications have produced dismal results. For businesses supporting Atari 8-bit, the future doesn't look good at all.

APRIL 30th. DEADLINE

If BELLCOM is to continue providing an Atari 8-bit P.D. software service throughout 1993, in the face of decreasing customer lists and increasing costs, then I desperately need your support now. Unlike a user group or someone operating a part-time P.D. service as a hobby, I must receive a large volume of P.D. sales in order to maintain the high quality of my service and to earn an adequate income for my family. So, BELLCOM's day of reckoning is APRIL 30th, 1993!

If I receive a large response of orders by APRIL 30th, then it'll be business as usual during 1993, and SUPPLEMENT #2 will be sent to current customers this Summer as planned. Let's hope it happens!

If a lack of order response indicates that there is no longer a market for Atari 8-bit P.D., then I shall be forced to close the library on June 30th of this year! If that happens, I'll send out one final mailing in May to all customers who order between now and April 30th. In other words, ONLY THOSE WHO ORDER THEME DISKS BEFORE APRIL 30, WILL GET IT! This special mailing will consist of a final Supplement, featuring all the new BELLCOM Theme Disks I'll create this Spring, plus some EXTRA SPECIAL OFFERS to thank those of you who so kindly responded with your support. Also, at that time, I'll list for sale any used Atari 8-bit equipment and software that will no longer be needed here at BELLCOM.

CONTINUE or CLOSE?

In other words, your order will be your vote of support. Will BELLCOM's Atari 8-bit P.D. & Shareware library continue or close down? The future of BELLCOM depends on you! If it so happens that I have to close the library, this may well be your last chance to obtain those disks you've been wanting. You'd be wise to take advantage of the new low prices and stock up now before it's too late!

Have you ever thought about what your hobby would be like without BELLCOM? Now more than ever, Atari owners need a proven resource like BELLCOM to keep their computer alive. In a time when Atari 8-bit suppliers and user groups are fast disappearing, BELLCOM is still just a postage stamp away. C.F. writes, "Thank you for your tremendous service in helping Atari 8-bit users like myself to keep our classic machines alive!". A.P. writes, "I am most impressed by the service and wish that I had responded to your advertisements in ANTIC magazine a long time ago - when ANTIC was being published.". These comments are typical of the many we receive from Atari users who rely on BELLCOM's service.

IT'S UP TO YOU!

Remember, if you don't receive your SUPPLEMENT #2 in the mail this Summer, then you'll know that you've left it too late to order. BELLCOM's Atari 8-bit library will have closed. Orders postmarked after June 30th will have to be returned, and one of the Atari 8-bit community's greatest resources will be gone. Please don't let that happen. For BELLCOM to survive we need at least 1500 customers to order just 10 disks each! Won't you please help us out and place an order before APRIL 30th? Your order can make the difference!

Please, send your order today! I know you won't let your fellow 8-biters down.

Atari news

Toronto Computes recently reported in its December issue that Atari Canada's former general manager is "bitter" that Atari closed its Canadian office just months after having pruned its Canadian staff down to 3 employees. According to the article, Atari has arranged for an independent repair shop in Toronto to service Atari ST products (it's Hightron, phone 416-299-8782), but "no one in Canada is now selling Atari computers". Contrary to the article, there are a few stores still selling Atari products, but the whole situation appears grim indeed.

In light of this, some have asked me, "should I abandon my 8-bit?". NO. Not on your life! As long as you're enjoying your computer, why turn to something else?? Atari 8-bit computers are built like tanks and will last to give you years of service and fun. By supporting BELLCOM and the companies listed in the INFO DISK, you'll be able to keep operating. Stock up on P.D. software now and you'll be able to compute into the next century!

Plans

Many have been asking, "If BELLCOM has to go out of business, what'll you do?". Well, for one thing, BELLCOM won't be going out of business; however, if sales don't improve, we may have to shift our focus from the Atari XL-XE and begin to concentrate on creating a P.D. library for a computer that's more popular in the marketplace. Believe me, after being self-employed in my own business for the past 7 years, I really don't care to go back to working for anyone else. I like being on my own too much!

Now, to answer the question I'm sure many of you are about to ask. When I do start a new P.D. library, it will support the Apple Macintosh computer line. The Macintosh is quite similar to the Atari ST in operation and it has a great future. I'm sorry, but I never was an IBM PC fan. The Atari's friendly operating system has spoiled me for using anything else!

I hope to do some desktop publishing first, though. It will provide me with a change of pace and I'll finally get to learn how to use my scanner and the new DTP software I've acquired. As I know many would like to make their computer pay for itself and provide extra income, my first project will be to write a business manual giving complete and detailed instructions on how anyone can set up and operate a successful P.D. & Shareware service. I started BELLCOM from scratch and built it up to become a major mail order supplier of P.D. software, and I'm happy to pass on whatever help I can.

Never fear, I won't be abandoning Atari computers. I'll still use my ST for business and I'll certainly keep my 130XE on hand for entertainment. When it comes to games and programming, I still prefer my old 130XE. It's powerful, easy to use, and above all, it's fun. It's my #1 hobby!

We'll be on Vacation

Last year we never got away for a vacation at all, and now that SUPPLEMENT #1 is finished, I need to take some time off to recharge my batteries! Since our two boys are both in their teens, and will soon be out living on their own, my wife and I decided it was a good time for us all to take a family holiday together. We'll be away for 2 whole weeks starting March 6th. As BELLCOM's entire staff (my family) will be gone, all orders received during that time will be waiting for our return on the 20th. So, please be patient, and I'll rush your order to you just as soon as I can when we get back.

YOUR HOME COMPUTER CAN EARN YOU MONEY!
HOW ANYONE CAN START A PUBLIC DOMAIN COPY SERVICE

I have made money on Public Domain & Shareware and I have had fun doing it. Why not you? In these difficult times, I know that many of you would like to have your hobby pay for itself, provide extra cash, and maybe even start you on a new career. Public Domain & Shareware has done all these things for me and more, and I'd like to share my methods with you. Because the market's too big for just BELLCOM. Because I like to help others. And because I know you'd really enjoy this business!

It's a proven fact in business that whenever you meet a need, you make money. There are millions of computer owners throughout the United States and Canada, and they are all confronted with the same problem. The high cost of commercial software! As a result, they look elsewhere. More and more of these people are turning to Public Domain & Shareware as a solution to their problem. The price is easily affordable and the quality just keeps getting better and better. It almost sells itself!

Over the years, many computer owners have asked me how to get started selling Public Domain & Shareware, but it's not something I could even begin to explain over the telephone or in a letter. So, I decided to write a straightforward manual to give you all the facts you need to make money and avoid the costly mistakes. This revealing manual will be of interest to any computer owner desiring to make money from home.

You'll learn – ■ How to start in your spare time at home with little or no money ■ How to create an outstanding P. D. & Shareware library that's unlike any other ■ How to prepare catalogues and brochures that really bring results ■ How and where to advertise ■ How to anticipate sales volume ■ How to buy your equipment and supplies wholesale ■ How to set prices that ensure profits ■ How to easily keep records ■ And more!

The manual will not be ready for publication until later this year. At that time, a brochure giving a full description of the manual and its cost will be mailed out to a special mailing list only. If you're interested in being on this list, then fill out and mail this coupon to BELLCOM today. Later, you'll receive the brochure to examine FREE – no cost, no obligation.

Why not let your home computer provide the extra money you need?
